## Schengen calculator example

This is an example of using the Schengen calculator <u>https://michaelnicholls.github.io/schengen/index.html</u>

It can be launched with this QR code

Please note that it is optimised to work on large devices, such as laptops or tablets.

*	18	19	20	21	22	23	28	8	22	23	28	25	26	27	28		39	20	21	22	23
-iii	25	26	27	28	29	30	- 31	*	29	30	21					10	26	27	28	29	30

Let's select some single dates, such as 6,7 and 8 July.

If we want to, we can pick an entire week by selecting the week number, for example the week starting 18 July can be selected with week number 30.

> Inst	ructions	į.													
Go to the	- first ava	ilable date	E. Sa	ve the sel	ected dat	tes:	Clear select	ed dates							
Today		<b>I</b> Se	Hected	Ĩ	First avai	iable	Availat	ple	Not	eveilable

28	4	5	6	2	8	9	10	33	8	9	10	11	12	13	14
29	11	12	13	14	15	16	17	34	15	16	17	18	19	20	21
30	18	-19	20	21	22	23	24	35	22	23	24	25	26	27	28
31	25	26	27	28	29	30	31	36	29	30	31				

None of these selections will change any date colours, so let's select all the weeks 27 – 38. Notice everything is still green, as we have selected 84 days (12 weeks by 7 days). As you select weeks and individual dates you may see that the display alters slightly. It is trying to keep today's date towards the centre.

If we now select week 39, a few things happen.

You will notice that we have a warning message in red. It's telling us that we have exceeded 90 days in 180. You will also see that there are some dates underlined in red. These are dates which you might have issues with.

If you look at 24 December, you will see that it has a black underline. This is the first date which you can consider being back in the Schengen zone. All the dates after this are underlined in green, as they are OK dates.

If we click on 25 September, it will now be deselected and you can see that all the future dates are green.

This is because on that date the number of days in the previous 180 that you have been in the Schengen zone would be more than 90.

You can change the visible months by using the navigation area:

If you click the left arrow, it goes back a month. The right arrow shows the next month. Clicking "August – July" comes up with a month selector:

And selecting "2021" will present a year selector:

There are buttons at the top which can be used to *Go to the first available date* and *Clear selected dates*.

The button *Save the selected dates* will save the dates into your browser and present another button to *Load the saved selected dates*. This can be useful in case you don't want to re-enter all your current dates.
